MDK 1500/3000 fruit and vegetable washer with grinder and brush

The MDK 1500/3000 machine is suitable for washing fruits and vegetables. The poured fruit falls directly into the water through brushes, where the staining is washed away, then the elevator conveyor pulls out from the water, where clean it with high pressure water and pass on to the next workstation. The fruits get a clean water wash on the conveyor. The machine is suitable for processing lines due to the adjustable speed of the elevator.

- fruit and vegetable washing and transporting at the same time
- efficient washing with high pressure nozzles
- mobil unit
- adjustable belt speed

The machine is compatible with the following equipment: MKLB 300/1000, MKSP 300/600/1400
