MKSP 300 belt press

MKSP 300 pressing belt is designed for extracting juice from fruits. The equipment is fully automated: the fruit is fed into the gullet and the fruit juice flows through to the outlet located at the lower part, on the side. A rotating brush and high pressure washer cleans the machine. The waste water leaves via an outlet which located at the lower part, on the side.

- new development
- stepless belt speed adjustment
- user friendly
- high performance (75%) juice yield (depending on the species of fruits)
- fully automated

The machine may be attached to the subsequent tools:

MKMD300, MKMDC 3000, MKMDK 1500, MKMDKC 1500, MKMDK 3000, Stop And Go, MKT 100, Dry matter carrier, High pressure washer, Compressor

Technical data

Electric connection 400V - 50 Hz
Electric performance 0,37 kW
Compressed air demand 6 bar-10l/min

Processing performance 300 kg/h (max)
Material 1.4301 stainless steel
Weight 170 kg
