

## Our solution for mobile fruit processing:

Fruit processing where you want! The Mobile MK Fruit Processing Unit can be installed and operated anywhere. To make it operate, only water, electricity and gas or diesel are needed - then the processing can begin.

The processing machines can also be used separately from the Mobile MK fruit processing unit. All machines are made of stainless steel. The vehicle body is made of aluminum and the box is made of plastic. The unit is equipped with high-pressure cleaner, compressor and on the customer's request it can be equipped with a weatherproof pre-tent.

## Why our solution better than the others?

- You can choose many options to fit your needs
- any fruit processing unit can be used separatly so, you can use it for any kind of working process
- very easy to use and to keep it clean
- it is built by of food friendly gradients and stainless steel materials
- can be upgraded later
